

AMENDMENT OF THE CLAIMS

1. (Currently Amended) An overlay trim member comprising a decorative main plate having at least one opening therein and defining first and second surfaces, at least one decorative insert plate which has a shape and dimensions corresponding to those of the opening and which is snugly disposed within a boundary of the opening, and a backing member on which the second surface of the main plate and the insert plate are mounted, the backing member configured for placement on a structural surface and comprising comprises at least one adhesive element on a surface opposite a surface upon which the main plate is mounted, the material and/or finish of the insert plate differing from that of the main plate; wherein the insert plate has an outside adjacent the first surface of the main plate thereby providing access to the insert for removal from the opening.

2. (Previously Presented) An overlay trim member according to claim 1, wherein said at least one opening in the main plate comprises a plurality of openings therein, and said at least one decorative insert plate comprises a corresponding plurality of decorative insert plates, with each of the insert plates having a shape and dimensions corresponding to those of one of the plurality of openings and being snugly disposed within boundaries of said openings.

3. (Previously Presented) An overlay trim member according to claim 1, wherein said at least one insert plate has an opening therein, and a decorative inner plate has a shape and dimensions corresponding to those of the opening in the insert plate and is snugly disposed within boundaries of the opening in the insert plate, the material and/or finish of the inner plate differing from that of the insert plate.

4. (Original) An overlay trim member according to claim 1, wherein at least one of the plates comprising the main plate and the insert plate comprises at least one layer of wood veneer.

5. (Original) An overlay trim member according to claim 1, wherein at least one of the plates comprising the main plate and the insert plate comprises carbon fiber.

6. (Original) An overlay trim member according to claim 1, wherein at least one of the plates comprising the main plate and the insert plate comprises coloured composite weave.

7. (Original) An overlay trim member according to claim 1, wherein at least one of the plates comprising the main plate and the insert plate comprises plastics material having a decorative film laminated thereon.

8. (Original) An overlay trim member according to claim 3, wherein the inner plate comprises at least one layer of wood veneer.

9. (Original) An overlay trim member according to claim 3, wherein the inner plate comprises carbon fiber.

10. (Original) An overlay trim member according to claim 3, wherein the inner plate comprises coloured composite weave.

11. (Original) An overlay trim member according to claim 3, wherein the inner plate comprises plastics material having a decorative film laminated thereon.

12. (Original) An overlay trim member according to claim 1, wherein the main plate is provided with a polyester, urethane or epoxy coating.

13. (Original) A overlay trim member according to claim 1, wherein all the plates are provided with a polyester, urethane or epoxy coating.

14. (Previously Presented) An overlay trim member according to claim 1, wherein the adhesive element of the backing member comprises double-sided adhesive tape.

15. (Original) An overlay trim member according to claim 1, wherein the trim member is non-flat.
